Quick Start Guide

For Learners
Sign In

1. In a browser, navigate to your Percipio sign in page.

![Login Screen]

2. Enter your user name and password, this maybe your network or corporate credentials if your organization configured Percipio single sign-on.

   **Note:** Passwords are case-sensitive

3. Select **Log in**.
Select Your Skills

The first time you sign into Percipio, you are prompted to select the skills you want to develop. Based on your selections, Percipio shows you personalized recommendations for content available to you in your library that you are likely to find the most interesting and relevant. The content displays in a navigable strip on the home page, making it easier to discover content important to you.

To edit your skill choices

1. Select Skills in the My Profile menu.
2. Choose the skills you want to develop
3. Select Next.
4. Optionally, select additional details about the skills.
5. Select Done.
Explore the Library

The Percipio Library contains all of the learning assets available to you. These assets are organized into a hierarchy to help you find content quickly and easily. You can explore the library, search for content, and add your favorite assets to your Playlist.

**Note:** You can explore the library in the selected Percipio language only. To see more content offerings you may be entitled to, change your language setting, then explore again.

To explore the Library

1. At the top of the home page, click **Library**.
2. Choose your way to explore:
   a. Select **Skill Areas** to open the Library home page, then select the area and subject under **What would you like to learn today.**
b. From the menu directly, select the specific area and subject, a Certification, an Aspire Journey, or something from
Library organization

- **Skill Area**: Left-most column, Skill areas are broad categories relating to a particular skill.

- **Subject**: A Skill area is broken into several subjects, each relating to a particular branch or course of study. Select a Skill area to see its subjects.

- **Channels**: Channels are the core building blocks of the library. A channel is where you go to learn everything and anything about a particular subject area that interests you.

- **Certifications**: Certifications are a unique area within the Library. You can browse certifications from various vendors and select channels focused on presenting targeted content for a particular certification path. You only see certifications in the library if you are entitled to them.

- **Aspire journeys**: Journeys are structured learning paths which provide content to achieve the skills for a specific job role or function.

- **Content**: Content includes courses, videos, books, book summaries, audiobooks, audio summaries, live courses, Practice Labs, and TestPreps.

- **Showcase**: This section contains the Live Course Calendar, Skillsoft Bootcamps, Leadercamps and Live Events that display if you are entitled to the content.
Search for Content

Use the Percipio search to quickly find content, such as courses, videos, or subjects. Percipio uses an intelligent search engine that auto-completes recommendations as you enter text into the search field. Depending on the terms you enter, search results can include any of your available content types, such as courses or books, and specific asset details, such as author, duration, expertise levels, technology versions, description, and more.

If an asset in the search results is:

- part of a course, the **From Course** field links back to the associated course.
- part of a channel, the **From Channel** field links back to the associated channel(s).
- part of a journey, the **From Journey** field links back to the associated channel(s).
- a book, the **Best Chapter match** field links directly to a chapter in the book that best matches your search terms.

The Percipio Search returns 20 results per page. To see additional results, click **Show More** at the bottom of the Search results page.
To search for content

1. In the top search bar, enter your search term.

2. Select or press Enter. The search results display.

Refine your search results

Use filters to refine your search results. These may vary based on the content returned in the original search results.

1. **Sort by**: select **Best Match** to view the closest results based on your entered search terms, or use **Newest** to see the most recently-released content that matches your entered search terms.

2. **Type**: provides various assets to search by.

3. **Content Source**: provides the vendor or provider who created and maintains the content.

4. **Expertise**: provides various search options for level of knowledge.

**Note**: Books are tagged as **Everyone** and are only included in filtered Expertise results if you select **Everyone** as one of your filters. Channels do not have an explicit Expertise level, and are included in filtered results regardless of the Expertise filter selection.
5. **Duration**: provides various search options for time to complete the content.

   **Note**: The Duration filter is not available in ELSA.

6. **Training Credits**: provides the option to search by training certifications.

To use filters

Select the types of content you want to include in your refined results. You can select multiple filters to narrow your search results.

The selected search filters display on the left of the Search page and the search results update with each selection.

   **Note**: When using the filters, the counts update to reflect the new filtered results. If all of the selections are filtered out, the count shows 0 and is disabled.

The filter options vary based on the content returned in the original search results.
Add Content to the Playlist

Playlists provide a quick and easy way for you to organize content that is of interest to you. Save content to one or more of your playlists so you can view it later.

You can add content to your Playlist from almost anywhere in Percipio, including the home page, your search results, the library, and when accessing the content itself.

- From any content card, select the More action menu. Select either:
  - **Save for later:** This puts the item in a generic folder saved for later.
  - **Playlist add/remove:** This allows you to put the item in an existing playlist or a new playlist that you can create.

- To access your Playlist, click **Playlist** in the **My Profile** menu.
