

Voluntary Product Accessibility Template – Skillport 7.X (June 2013)

<i>Explanation of Supporting Features</i>	
Supports	Use this language when you determine the product fully meets the letter and intent of the Criteria.
Supports with Exceptions	Use this language when you determine the product does not fully meet the letter and intent of the Criteria, but provides some level of access relative to the Criteria.
Supports through Equivalent Facilitation	Use this language when you have identified an alternate way to meet the intent of the Criteria or when the product does not fully meet the intent of the Criteria.
Supports when combined with Compatible AT	Use this language when you determine the product fully meets the letter and intent of the Criteria when used in combination with Compatible AT. For example, many software programs can provide speech output when combined with a compatible screen reader (commonly used assistive technology for people who are blind).
Does not Support	Use this language when you determine the product does not meet the letter or intent of the Criteria.
Not Applicable	Use this language when you determine that the Criteria do not apply to the specific product.
Not Applicable - Fundamental Alteration Exception Applies	Use this language when you determine a Fundamental Alteration of the product would be required to meet the Criteria (see the access board standards for the definition of "fundamental alteration").

Voluntary Product Accessibility Template – Skillport 7.X (June 2013)

Standard	Reference	Supporting Features	Remarks
1194.22 Web-based Intranet and Internet Information and Applications			
A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	1194.22(a)	Supports with exceptions	Images have alt attributes.
Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	1194.22(b)	Not applicable	Multimedia presentations are not used on Skillport.
Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	1194.22(c)	Supports	The pages in Skillport do not use color coding as a sole means of conveying information..
Documents shall be organized so they are readable without requiring an associated style sheet	1194.22(d)	Supports	Heading tags are applied as appropriate.
Redundant text links shall be provided for each active region of a server-side image map	1194.22(e)	Not Applicable	Server side image map links are not used.
Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	1194.22(f)	Not Applicable	Client side image maps are not used.
Row and column headers shall be identified for data tables.	1194.22(g)	Supports	Data tables include TH tags for identifying column and row headers.
Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	1194.22(h)	Supports	Data tables include scope attributes to associate data cells with corresponding columns.
Frames shall be titled with text that facilitates frame identification and navigation.	1194.22(i)	Supports	Frames are marked with appropriate attributes.
Pages shall be designed to	1194.22(j)	Supports	The pages have been designed to not cause flickering in this

Voluntary Product Accessibility Template – Skillport 7.X (June 2013)

avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.			range.
A text-only page, with equivalent information or functionality, shall be provided to make a web site comply with the provisions of this part, when compliance cannot be accomplished in any other way. The content of the text-only page shall be updated whenever the primary page changes.	1194.22(k)	Supports	A text-only page is not required..
When pages utilize scripting languages to display content, or to create interface elements, the information provided by the script shall be identified with functional text that can be read by Assistive technology.	1194.22(l)	Supports	Client-side scripting is accessible.
When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	1194.22(m)	Supports	Plug-ins are not required for the use of Skillport.
When electronic forms are designed to be completed on-line, the form shall allow people using Assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	1194.22(n)	Supports	The forms on Skillport employ explicit labeling to provide identifying information to assistive technology.
A method shall be provided that permits users to skip repetitive navigation links.	1194.22(o)	Supports	A method to skip repetitive navigation links is provided throughout Skillport.
When a timed response is required, the user shall be alerted and given sufficient time to indicate more time is required.	1194.22(p)	Not Applicable	Timed responses are not needed.
